Summary

Software engineer working across backend engineering, full-stack web, AI engineering and mobile development. Works primarily with C#/.NET and ASP.NET Core, TypeScript and React, Python and FastAPI, and Flutter, with containerized deployment on Linux. Builds and operates his own systems, including the Universal AI Software Factory and the Najmah AI story platform.

Experience

Software Engineer — full-stack, backend and AI systems

Independent / self-directed · Cairo, Egypt · Present

Designs and builds backend services, web and mobile applications, and AI-driven systems, including the Universal AI Software Factory and the Najmah AI story platform.

- Design and implement backend services and REST APIs.
- Build full-stack web applications with React and TypeScript.
- Integrate LLMs, AI agents and automation into product flows.
- Deploy and operate services with Docker, Linux and NGINX.

Education

Bachelor of Engineering — Computer Science

Cairo University · 2016

Diploma in Software Engineering / Back-End Development

2020

Diploma in Basics of Modern Education

2021

Diploma in Digital Marketing

2022

Skills

Backend: C#, .NET, ASP.NET Core, Entity Framework Core, REST APIs, API Architecture

Frontend: TypeScript, JavaScript, React, Vite, HTML, CSS, Tailwind CSS, Bootstrap

Mobile: Flutter, Dart

AI Engineering: Python, FastAPI, LLM integrations, AI Agents, AI Automation, AI Orchestration

Databases: SQL Server, PostgreSQL, Entity Framework Core, Redis

DevOps & Infrastructure: Docker, Linux, NGINX, Git, GitHub, HTTPS / SSL, Reverse Proxy, Deployment

Other Languages & Tools: C++, Godot

Selected Projects

Universal AI Software Factory

A platform that takes structured requirements and drives them through specialised generation and validation tracks toward production-oriented software systems. The control plane is exposed as a public API.

Python, FastAPI, Docker, Linux, NGINX

Najmah Story Studio

A platform for generating, saving and exporting Arabic-first children's stories with social-emotional learning themes, including PDF, text and narrated audio output.

React, TypeScript, Vite, Tailwind CSS, shadcn/ui, NestJS, Supabase, Docker, NGINX
